

[CHECK OUT OUR NEW TOOL, CONSOLE NINJA](#)  [×](#)

# Your Order Has Been Successfully Completed

**Thanks for ordering Wallaby.js + Quokka.js**, we hope you enjoy working with our tools!

You will receive **two emails shortly**, with the payment receipt and with the [license details](#).

Feel free to [contact us](#) if you would like **your company's or project's logo** to be listed [on our website](#).

We would also appreciate if you would **rate the extension** in the [VS Code marketplace](#), or [JetBrains plugin repository](#) to help us improve and grow.

## Our other products

If you find Wallaby.js useful, you may like to check out our other products:

- [Quokka.js](#) - Quokka.js is the #1 tool for exploring and testing JavaScript / TypeScript without leaving your editor.
- [Console Ninja](#) - See Console Log output and Errors right next to your code from your development server **(coming soon)**.
- [Dingo](#) - VS Code extension to download, install and open git repos at light speed.

## Stay updated

You may follow us on twitter [@WallabyJs](#) to receive all the latest news about the product.

We also send out project updates every now and then. Have a look at [our past newsletters](#) to decide if they're worth subscribing to.
